

# Grout Sealer

Swisstek Grout Sealer is a water based sealer designed for the protection of all sanded and non-sanded grout joints. It forms an invisible barrier that is resistant to moisture and stains.

## Features

- ◆ Water based and eco-friendly.
- ◆ Economical.
- ◆ Good permeability with no shine and with a natural look.
- ◆ Excellent adhesion and good abrasion resistance.
- ◆ Good water repellent effects and stain protection.
- ◆ For interior and exterior applications.
- ◆ With a unique applicator tip for easy application.

## Application Scope

- ◆ For all sanded and non-sanded cementitious grout joints.

## Application Instructions

- ◆ The grout joints must be clean, dry and free from all foreign materials.
- ◆ For newly grouted surfaces, apply the grout sealer after 72 hours of application.
- ◆ For existing old floors, you may clean the grout surface by using Swisstek Heavy Dirt Tile Cleaner and allowing the surface to dry for 24 hours before applying the Grout Sealer.
- ◆ Apply the sealer using the unique applicator tip.
- ◆ A second application may be applied within 30 minutes or after to ensure that the first layer has been completely absorbed by the surface.

- ◆ Any grout sealer on an adjoining tile or natural stone must be wiped off with a clean, damp towel within a few minutes of the grout sealer being absorbed by the grout joints.
- ◆ The finished area must be kept for 6 hours in its state for curing.
- ◆ For optimum results, the finished area must be kept dry and free from any staining material for 36 hours.

## Package

- ◆ 200 ml / 24 bottles in one pack

## Coverage

- ◆ 400 sq. ft. / bottle

The coverage may vary depending on the surface porosity, surface absorption and application method.
