# WHO ARE WE

Welcome to Swisstek Ceylon PLC, a pioneering force in the flooring market since its inception in 1967 as Parquet (Ceylon) Ltd. Over the years, we have grown and evolved, culminating in our listing on the prestigious Colombo Stock Exchange in 1983.

Our corporate landscape was further fortified in 2003 when we joined forces with the esteemed Lanka Walltiles Group. With an unwavering commitment to excellence, we attained ISO 9001 certification in 2015 and subsequently changed our name to Swisstek Ceylon PLC in 2011. As we proudly celebrated 50 years of unrivaled service in 2017, we embarked on the challenge of introducing innovative products that redefine the market.

At Swisstek, our passion for manufacturing Tile Adhesive, Waterproofing solutions, Tile Grout, Skim coat and other exceptional products knows no bounds. We strive to exceed the expectations of our esteemed customers by upholding the highest standards in every aspect of our operations. This commitment extends to the continual development of our talented human resources, sourcing and utilizing only the finest materials, upgrading our technical facilities, adhering to the ISO 9001:2015-based management system and ensuring compliance with all statutory and industrial regulations. We take great pride in being the only brand certified with SLS. What sets us apart is our prestigious distinction as the sole brand to obtain SLS certification. We proudly stand as trailblazers, being the first brand to achieve this distinction and the only brand to offer SLS certified products.

# OUR MISSION

To produce and market exceptional quality products at optimum affordability.

# OUR VISION

To become the leading manufacturer of Tile Grout, Tile Mortar, and Decorative Pebbles in Sri Lanka while also supplying wooden flooring to enhance the range of flooring products available through other group companies.

# ISO 9001:2015 CERTIFICATION

Through this certification, the Sri Lanka Standard Institution certifies that the Quality Management System of Swisstek Ceylon PLC has been assessed and approved in accordance with the requirements of ISO 9001:2015 since the year 2014.

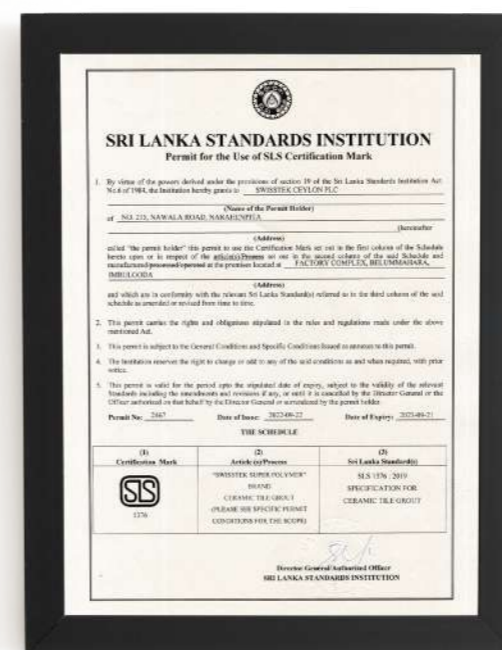

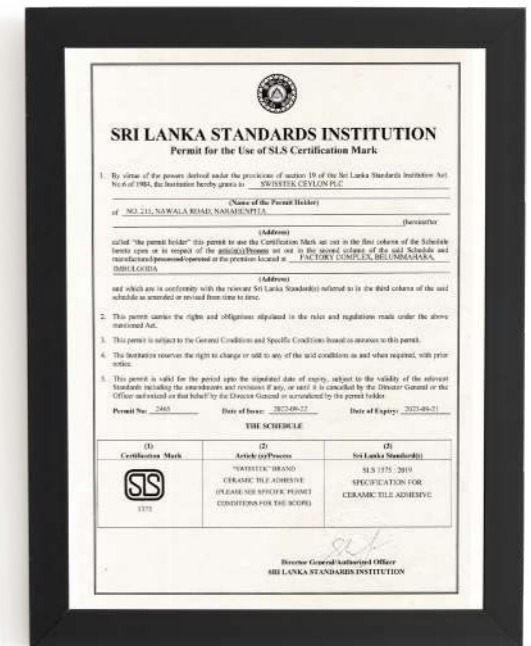

# SLS 1375 CERTIFICATION

Sri Lanka standard institute certifies that Swisstek Tile Adhesive is manufactured as per SLS 1375: 2019 (Specification for ceramic tile adhesive) since year 2021.

# SLS 1376 CERTIFICATION

Sri Lanka standard institute certifies that Swisstek Tile Grout is manufactured as per SLS 1376: 2019 (Specification of Ceramic tile grout) since year 2021.

# TILE ADHESIVE RANGE

Swisstek Tile Adhesive is manufactured in accordance with international standards and the ISO 9001:2015 quality management system. The company conducts frequent inspections in independent laboratories both local and international to maintain the premium standards of its output. Swisstek's Tile Adhesive can ideally be used for the installation of ceramic tiles, porcelain tiles, vitrified porcelain tiles, marble tiles, mosaic tiles, granite and other materials used on both walls and floors. The product is formulated with cement, ceramic fillers, polymer, and a unique binding agent, all of which improve the product's resistance to water while increasing strength and longevity.

After 20 min	0.5	≥ 0.5N/mm <sup>2</sup>

Other Components	Swisstek Super Tile Adhesive Performance	Requirement as per SLS 1375: 2009 (C2)
Pot Life (hr)	1 hr	Not defined

# SUPER PLUS TILE ADHESIVE (C2T)

Swisstek's Super Plus Tile Adhesive was specifically designed and manufactured with damp/wet areas in mind. It is perfect for use on bathroom floors and walls, as well as for securing tiles to freshly completed cement screed surfaces and existing cement surfaces. This Adhesive can be used to apply tiles to tiles after roughing. This product meets C2T quality standards and adheres to SLS 1375 quality standards.

Slip resistance (Test method : SLS ISO 13007-2 : 2013)	0.16	≤ 0.5mm

# ULTRA GRIP TILE ADHESIVE (C2TE)

Swisstek's Ultra Grip Tile Adhesive is the go-to for the wettest of wet locations, with features including high flexibility, strong adherence, and anti-slipperiness. Swimming pools, water tanks, and even open surfaces like rooftops with strong thermal expansion and contraction are examples. It can be used with any type of tile on both fresh and weathered cement screed. This product's adhesion is so strong that it may be used directly to apply tiles to tiles. This product meets C2TE quality standards and SLS 1375 quality standards.

Tensile Adhesion Strength (Test method : SLS ISO 13007-2 : 2013)	Swisstek ultra grip Tile Adhesive Performance	Requirement as per SLS 1375: 2009 (C2)

# ULTRA GRIP WHITE TILE ADHESIVE

It has great bonding and anti-slip qualities. White in color. Ideal for marble and glass mosaic tiles. High water resistance and resistance to thermal expansion and contraction. It can be used with any type of tile on both fresh and weathered cement screed. This product's adhesion is so strong that it may be used directly to apply tiles to tiles. This product meets C2TE quality standards.

# SURFACE PREPARATION

1  
Clean the levelled sub floor surface thoroughly and remove any dust, oil, sealers etc. Wet the surface of the sub floor, before applying SWISSTEK.

2  
Fill a container with 7-8 litres of water.

3  
Mix in the contents (25kg) of the Adhesive pack.

4  
Make sure the Adhesive and water is mixed thoroughly. A stirring machine is recommended for proper mixing.

5  
Apply the mixture to the surface (Wall/Floor) with a recommended notched trowel. Fix tiles within 20minutes of application.

6  
Place tiles with a minimum gap of 3mm.

7  
Use a rubber hammer to adjust the level and lines of tiles.

8  
Wipe Off any excess Adhesive from the tile surface.

9  
**WAIT**  
24 HRS  
Please wait 24 hours for tiles to be fully and firmly fixed.

10  
**GROUT**  
For the best finish, use Swisstek Grout and Grout Sealer

# AQUA SHIELD 2K WATERPROOFER

Swisstek Aqua Shield 2K Waterproofing, a top-of-the-line solution that guarantees to keep structures protected against water damage. Formulated with a cementitious base and expertly blended with graded aggregates and specially designed acrylic additives, Swisstek Aqua Shield 2K Waterproofing is a true testament to advanced waterproofing technology. Swisstek Aqua Shield is perfect for safeguarding concrete slabs, rooftops, columns, retaining walls, bases, foundations, pile caps, swimming pools, water tanks, bathrooms and kitchens from the harmful effects of water exposure.

Test	PERFORMANCE
Color of the Slurry	Dark grey with no smell
Workability	Good
Pot Life(hr)	> 3 hrs
Over coat Time	4 hr
Cured film membrane	Flexible
Tensile adhesion strength under standard condition	≥ 0.5N/mm <sup>2</sup>
Water Impermeability Test-2.0 bar for 7 Days	Pass
Crack bridging ability	≥ 2.0 mm

## AQUA SHIELD FEATURES

1. Prevents Water Penetration.
2. Easily Applied By Brush.
3. Flexible And Elastic.
4. Excellent Adhesion To Concrete And Masonry Substrate (High Tensile Strength).
5. Crack Bridging Property.
6. Resistance To Chloride Ion Diffusion.
7. Compatible With Ceramic Tile Adhesives.
8. Non-corrosive.
9. 1 year shelf life.

# AQUA SHIELD

## MIXING

1 Before mixing, shake liquid B well.

2 Pour the entire contents of liquid B (2 Kg) in to the mixing bucket.

3 Slowly add powder A(3 Kg) in to the bucket while mixing.

4 Use a low speed mechanical mixer to mix the two components in to a uniform slurry.

# AQUA SHIELD

## APPLICATION

1 Remove all impurities and loosely adhering material from the surface. Use a wire brush and thoroughly lean the surface. Vacuum off the resulting residue/ powder.

2 Wash the area with clean water and the substrate should be damp, without water,

3 Use a masonry float or brush to apply the mixed Aqua Shield Waterproofing coating.

4 The first coat (0.8mm - 1 mm) should be applied in a vertical direction to cover the entire area.

5 The first coat should dry for 4-6 hours.

6 The second coat (0.8mm - 1 mm) should be applied in a horizontal direction.

7 The application area should be covered from sunlight and wind to prevent shrinkage.

8 Curing by air is sufficient.

9 Once the waterproof is dried apply a protective screed on the water proofed area.

10 The waterproofed surface may be used only after 24 hours of curing.

11 For Swimming pools the waterproofed surface may be used only after 7 days of curing.

# SW - 101 (EPOXY GROUT)

Swisstek SW – 101 a cutting edge solution designed to revolutionize your tiling projects. Crafted with meticulous precision, SW – 101 grout is not your average grouting material; it's a true game-changer in the world of construction.

SW – 101 is a hygienic, hard-wearing, impervious, epoxide resin-based grout with a high degree of resistance to chemical attack, abrasion, and impact. The cured grout does not transfer taints to foodstuffs, does not permit the entry of bacteria or dirt and is easily maintained in a sterile condition.

But the true brilliance of our SW – 101 grout lies in its ability to preserve the purity of your environment. Unlike conventional grouts, the cured surface of our SW – 101 grout leaves no room for taints to leach into foodstuffs. Whether you're in a commercial kitchen, a food processing area, or any space where hygiene is paramount, rest assured that our SW – 101 will pass the test with flying colors. We are committed to ensuring the safety of our products for our customers, including those engaged in artistic and craft-related activities. Our epoxy resin and hardener comply with the safety standards ASTM D4236 and EN 71.

							
EXCELLENT CHEMICAL RESISTANCE	100% STAIN FREE	100% WATERPROOF	ANTIBACTERIAL AND ANTIFUNGAL	WITHSTANDS HIGH TEMPERATURES	COVERAGE AREA	5 KG PACK	2 YEARS SHELF LIFE

## SW - 101 FEATURES

1. VOC Free (Zero Volatile Organic Compounds).
2. No BPA (Do not contain any traces of Bisphenol-A).
3. Not classified as dangerous goods by the criteria for transport by road, rail, International Maritime Dangerous Goods Code (MDG code) for transport by sea and International Air Transport Association (IATA) dangerous goods regulations for transport by air.

## SW - 101 AREAS OF APPLICATION

BATHROOMS

SWIMMING POOLS

STEAM ROOMS

SPLASHBACKS

ROOF TOPS

LABORATORIES AND HOSPITALS

HIGH FOOT TRAFFIC AREAS

INTERIOR AND EXTERIOR USAGE

## SW - 101 APPLICATION PROCESS

1. Mix the two liquid components and solid powder as per given ratios using a mixer.
2. Apply the SW-101 mixture between tiles evenly with a rubber-faced grouting trowel or float. Remove excess grout.
3. Don't wait too long to remove excess grout to minimize residue.
4. Wet the surface with water and use a scrubbing pad to clean grout residue. Change the water if it gets sticky.
5. Thoroughly clean the surface with clean water and a sponge within a day to prevent stickiness.
6. Allow a minimum of 24 hours for curing, avoiding any foot traffic during this period.

## SW – 101 TECHNICAL INFORMATION

### Physical Properties of Epoxy Grout at 27 ± 1°C

Pot Life	60 minutes
Foot Traffic:	24 hours
Full Cure	7 days (For Swimming Pools)
Temperature	Prolonged 5°C to 50°C
Resistance	Intermittent up to 70°C
VOC Content	Free
BPA	No
Specific gravity	1.3 -1.6

## SW – 101 PROPERTIES TESTED TO ISO 13007-4:2013

Fundamental Characteristics (Test Method: ISO13007-4:2013)	SW – 101 Performance	Minimum Requirement as per ISO13007-4:2013
Flexural Strength	40.7 N/mm <sup>2</sup>	≥ 30N/mm <sup>2</sup>
Compressive Strength	85.0 N/mm <sup>2</sup>	≥ 45N/mm <sup>2</sup>
Water Absorption (After 240 mins)	0.03 g	≤ 0.1g

## SW – 101 CAN BE USED AS AN EPOXY ADHESIVE

Tested Surfaces	Tensile Adhesion Strength
Concrete	2.7 N/mm <sup>2</sup>
Tile on tile	2.3 N/mm <sup>2</sup>
Plywood	0.9 N/mm <sup>2</sup>
Backer Board	0.5 N/mm <sup>2</sup>

TEST METHOD : ISO 13007-2

## SW – 101 MIXING AND APPLICATION

Prior to application, ensure that all surfaces are dry and free from any standing water.

Remove any residue and clean the grouting grooves. Using a vacuum is recommended.

Pour the Hardner, and Resin (1 bottle each) into a container.

Mix the Hardner, and Resin for 2 minutes. Use 300rpm mixing speed.

A mechanically powered mixer or a drill fitted with a helix type paddle should be used to ensure proper mixing.

Gradually add the filler powder (1 pack) while mixing. Continue for 3 minutes or until a uniform consistency is obtained.

The grout should be applied only in one direction, not both ways.

Once Hardner, Resin and Filler Powder is mixed, apply grout as soon as possible (within a period of 1 hour).

Remove any grout remaining on the tile surface before it hardens (this needs to be done within 1 hour of mixing).

If temperatures are less than 24°C, the cure rate will be slow.

**USING MASKING TAPE IS RECOMMENDED, WHEN APPLYING ON ROUGH TILES.  
CONTACT TECHNICAL SUPPORT FOR INSTRUCTIONS, WHEN APPLYING ON PRINTED TILES.**

# TILE GROUT RANGE

With 25 colors for the customer to choose from, Swisstek Tile Grout is ISO certified and is the only SLS Certified product of its kind available in the Sri Lankan market. The company adheres to the highest quality standards in its creation and conducts regular examinations within independent laboratories to verify that all guidelines are followed. This unfading and non-perishable tile grout is perfect for joints between one and six millimeters (1mm-6mm) in width and is well worth every cent spent as every 1 KG pack can cover an area between 80 and 100 square feet (depending on tile size). The benefits are truly endless. This best-seller comes in two distinct formulas, each of which is fitted for a different purpose and surface.

Water absorption after 240 min	0.66	≤ 5g

## TILE GROUT RANGE USAGE AND SURFACES

Swisstek Grout is ideal for grouting joints that are between 1mm and 6mm in width. Mixed with only water, it is easy to use and clean. Swisstek Grout can be used on all types of porous and non-porous floor and wall tiles such as Porcelain, Non-Porcelain, Ceramic, Slate, Granite, Cement-based and Terrazzo, Marble tiles, Glass Mosaics and as well as clay tiles such as Terracotta.

## TILE GROUT RANGE PREPARATION BEFORE APPLICATION

1. Before you start applying the grout, make sure the tile adhesive has set firmly. This takes at least 24 hours.
2. Make sure the grouting joints are clean and dry. Remove any spacer lugs such as excess adhesive or any loose foreign material or dirt from the joints.

## TILE GROUT RANGE APPLICATION PROCESS

1. Mix 1kg powder with approximately 0.3 litres (300ml) Of water. Mix well until the grout is easily applied with a trowel. Make sure the mixture is not too thin or thick.
2. Use a rubber faced grouting trowel or a float to apply the grout mixture evenly between the tiles.
3. The grout requires at least 20 minutes to set and dry.
4. Remove excess grout from the surface of the tile with a rubber-faced grouting trowel or rubber float using a diagonal motion.
5. Let the grout dry thoroughly for around 30 minutes. Then use a damp sponge to gently wipe the surface of the tiles to remove any remaining excess grout (If the surface is rough, clean the surface within 15 minutes).
6. Allow at least 24 hours for the grout to harden. Do not wash, trample or step/walk on the surface during this period.
7. For best results, the set grout should be damp-cured for a minimum of 48 hours, thereafter.
8. The proper colour of the grout will show after 48 hours of setting.
9. It is highly recommended to apply a grout sealer after the grouting process.

## TILE GROUT RANGE AVAILABLE COLOURS

**\*ACTUAL PRODUCT COLOURS MAY VARY SLIGHTLY FROM THOSE DEPICTED HERE.**

# GROUT SEALER

Swisstek Grout Sealer is a water-based penetrating coating liquid that was formulated to protect sanded and unsanded grout joints against moisture and stains. The customer is assured that the lines running in between tiles remain clean and crisp by properly applying this transparent solution along the grout lines.

## GROUT SEALER FEATURES

1. Water based and eco-friendly. Economical.
2. Good permeability with no shine and with a natural look.
3. Excellent adhesion and good abrasion resistance.
4. Good water repellent effects and stain protection.
5. For interior and exterior applications.
6. With a unique applicator tip for easy application.
7. 18 months shelf life from MFD.

## GROUT SEALER APPLICATION SCOPE

**FOR ALL SANDED AND NON-SANDED CEMENTITIOUS GROUT JOINTS.**

## GROUT SEALER

## APPLICATION INSTRUCTIONS

1. The grout joints must be clean, dry and free from all foreign materials.
2. For newly grouted surfaces, apply the grout sealer after 72 hours of application.
3. For existing old floors, you may clean the grout surface by using Swisstek Heavy Dirt Tile Cleaner and allowing the surface to dry for 24 hours before applying the Grout Sealer.
4. Apply the sealer using the unique applicator tip.
5. A second application may be applied within 30 minutes or after to ensure that the first layer has been completely absorbed by the surface.
6. Any grout sealer on an adjoining tile or natural stone must be wiped off with a clean, damp towel within a few minutes of the grout sealer being absorbed by the grout joints.
4. The finished area must be kept for 6 hours in its state for curing.
5. For optimum results, the finished area must be kept dry and free from any staining material for 36 hours.

## GROUT SEALER

## COVERAGE

1 Bottle (200ml)

400 sq. ft

THE COVERAGE MAY VARY DEPENDING ON THE SURFACE POROSITY, SURFACE ABSORPTION AND APPLICATION METHOD.

# TILE CLEANER

Swisstek heavy-dirt tile cleaner is formulated to maintain the natural beauty of tiled surface after installation. It assures all types of tiles and even products such as marble are preserved in their almost original appearance by efficiently removing heavy dust and dirt. 99.9% germ protection, which certified by outsourced laboratory.

## TILE CLEANER INGREDIENTS

1. Nonionic/ anionic surfactant mixture
2. EDTA
3. HCL
4. Disinfectant liquid

## TILE CLEANER PACKAGING AND AVAILABILITY

500ml

1L

## TILE CLEANER DIRECTION TO USE

Tile cleaner can dilute in water in a 1: 5 ratio (maximum), depending on the surface to be cleaned. Do not mix with other cleaning agents

# QUICK FLOW AND PRIMER

Swisstek Quick Flow is a cement-based levelling adhesive that is used on concrete floors mixed with water prior to the application of materials like carpet, vinyl, tiles, and parquet. It can be used on concrete floors as a thin layer levelling and scraping adhesive. It is a highly efficient product that is very simple to use. When cured, it offers a seamless, level surface for installing a multitude of floor coverings.

Swisstek Primer is an acrylic based liquid which is applied prior to applying Swisstek Quick floor. The primer acts as a layer prevents air travelling to Quick floor from the concrete as well as the concrete absorbing water from the quick floor mix allowing the mixture to cure properly.

Product Properties	Swisstek Quick Floor	Swisstek Primer
Physical State	Powder	Liquid
Color	Grey	White
Shelf Life	2 years from date of manufacturing/ In seal condition	6 months from date of manufacturing/ In seal condition
Packaging	20 Kg	05 L
Pot Life	20-30 minutes depending on temperature	-
Application Thickness	1-20 mm	-
Compressive strength after 28 days	Approximately 30 MPa	-

## QUICK FLOW COVERAGE

5kg

3mm (three) screed

**SWISSTEK PRIMER SHOULD BE APPLIED ON THE APPLICATION FLOOR AND SLIGHT STICKINESS SHOULD BE THERE AT THE MOMENT OF QUICK FLOW APPLICATION.**

## PRIMER COVERAGE

1 Bottle (5L) for 10 Bags  
of Swisstek Quick Flow  
(20Kg Bag)

375 - 400  
sq. ft

**THE APPLICATION FLOOR SHOULD BE DAMPED AT THE MOMENT OF SWISSTEK PRIMER APPLICATION.**

## QUICK FLOW AND PRIMER APPLICATION INSTRUCTIONS

### SURFACE PREPARATION

1. All Surfaces must be clean and free from any loosely adhering particles or contaminants such as dirt, dust, grease, oil and etc.
2. Cement laitance should be removed from the concrete surface.
3. Any existing paints, coatings or floor covering must be removed.

**APPLYING THE SWISSTEK PRIMER BEFORE APPLYING THE FLOOR LEVELING COMPOUND IS RECOMMENDED FOR BETTER ADHESION.**

### MIXING

1. Pour the required amount of water (For a 1 kg use 260ml of clean water, this amount can be adjusted slightly to achieve the desired consistency and the layer thickness.) in to a mixing container and slowly add the powder while mixing continuously with a mixing machine.
2. Thoroughly mix until a uniform, lump free consistency is achieved. A minimum mixing time of 3 minutes is recommended.
3. The consistency can be adjusted by adding slightly more powder or water, if required.

### APPLICATION

1. The mixed material should be poured onto the prepared and primed floor surface while the primer is still tacky. If the primer has dried out it should be reapplied to ensure maximum adhesion.
2. After dispersion of material, if needed the compound can be trowelled to gain the desired finish.

## CURING TIME

It takes 48 hours to cure the surface. (This may vary with the climate condition). Wet the surface by using water about 4 days after 24 hours in application.

Or cover the applied surface by using the polythene sheet after surface drying.

## QUICK FLOW AND PRIMER IMPORTANT NOTICES

**RAPID DRYING OUT DUE TO SUN OR WIND MUST BE AVOIDED AND IN THESE SITUATIONS, FLOOR LEVELING COMPOUND SHOULD BE COVERED WITH POLYTHENE OR WET HESSIAN AFTER APPLICATION.**

**FLC WILL NOT BRIDGE "LIVE" CRACKS IN CONCRETE FLOORS.**

# SKIM COAT RANGE

Swisstek skim coat is a textured compound, used to smooth-out surfaces of walls prior to painting. Swisstek Skim Coat is certified good quality with international standards for both interior and exterior application. Its smooth texture is a result of its water-based compound mixture, which is produced in the white color, making it versatile for any surface and ideal to meet any expectations of the customers.

Name of the Test	DELUXE SKIM COAT	PREMIUM SKIM COAT
Crackling	No crack	No crack
Putrefaction	No putrefaction within 4 days	No putrefaction within 4 days
Flow table	96 %	91 %
Fineness	0% Retained	0% retention on 150 micron sieve

<b>150-200</b> SQ. FT	<b>20</b> KG		<b>2</b> YEARS
COVERAGE AREA (2MM THICKNESS)	1KG PER BAG	JUST ADD WATER	2 YEAR SHELF LIFE

# DELUXE SKIM COAT

Deluxe Skim Coat is an excellent product with special polymer content that can be applied on walls which will give a bright and precise finish to the wall. This will make the color you choose visible as for your expectation. The product is easy to work with and can cover more square feet. Deluxe Skim Coat is awarded with ISO quality certification. Deluxe is a recommended for indoor usage.

-   
INTERNAL USAGE
-   
BRILLIANT WHITE FINISH
-   
NO CRACKING OR PEELING OFF
-   
SMOOTH FINISH
-   
HIGH QUALITY RAW MATERIALS

# PREMIUM SKIM COAT

PREMIUM Skim Coat is an excellent product with special polymer content that can be applied on walls which will give a bright and precise finish to the wall. This will make the color you choose visible as for your expectation. The product is easy to work with and can cover more square feet. Premium Skim Coat is awarded with ISO quality certification. Premium Skim coat is a specially formulated product which can be applied for interior walls as well as exterior walls. Premium skim coat is developed to withstand any weather condition.

-   
INDOOR & OUTDOOR USAGE
-   
EXCELLENT SURFACE BONDING STRENGTH
-   
NO CRACKING OR PEELING OFF
-   
SMOOTH FINISH
-

BRILLIANT WHITE FINISH

Spread Rate	20Kg(2mm thickness),150-200 square feet /Differ according to surface
Shelf Life	24 months in dry condition
Pot Life	1 1/2 hours
Touch Dry	1 1/2 hours
Thinner	Water
Color	White
Number of coat	1 or 2 as required
Mixing Ratio	7-8 liters of water per 20Kg bag
Recoat	After 24 hours
Sanding	After 24 hours
Maximum thickness of application	4mm (Two coats)

## SKIM COAT RANGE

## METHOD OF APPLICATION

1. Before the application Of the skim coat, remove all loosely adhering material from the wall surface with the help Of a wire brush or a sandpaper.
2. The wall surface must be free from dust particles, grease, Oil, fungus or moss.
3. Any existing damage, cracks and voids have to be repaired before the skim coat application.
4. If the surface is extreamly dried, moist the surface slightly before application.
5. 7-8 Lts. of clean water is required for 20 Kgs. of skim coat powder.
6. Mix the amount Of skim coat with the slow addition Of cold water, with a mechanical stirrer to get an excellent, cohesive and consistent mix.
7. Mix only the required amount Of skim coat at a time.
8. Apply the first coat with a putty blade or application trowel on the prepared wall.
9. Allow it to surface dry, generally not more than 12hrs.
10. Apply the second coat evenly if required.
11. After the surface dries, use sandpaper to get a smooth finish.

# DECORATIVE PEBBLES

Swisstek Decorative Pebbles are used to add beauty and decorate aquariums or any other comfort space. These pebbles come in a diverse fashion of vibrant colour and picturesque beauty and available in five different colors of crystal white, black, ivory, grey and pink. These stones are designed to transform spaces into one that is elegant and has a pop of colour. These stones can be used for both interior and exterior and are of the highest quality in Sri Lanka.

# GENERAL PURPOSE NON-ACIDIC SILICONE

Swisstek Silicone is designed to deliver exceptional results with its cutting-edge formula that offers unmatched sealing capabilities. Swisstek Silicone is created with the finest materials to provide higher tensile strength and excellent adhesion, which guarantees the surfaces are fully protected from any water leakages (100% waterproof). Swisstek Silicone is a non-acidic neutral silicone which is recommended for many surfaces and resistant to mold, yellowing or any surface discolorations.

- High Tensile Strength
- Excellent Adhesion
- NO SAG
- WATER PROOF
- LESS ODOR
- NON-ACIDIC
- NO DISCOLORATION
- CAPABLE OF ± 25% JOINT MOVEMENT
- RESISTANCE FOR MOLD AND YELLOWING

TECHNICAL DETAILS	Swisstek Silicone
Density	1.3 g/ml
Flow/Sag	Nil

# ROOF MASTER RANGE

Swisstek Roof Master is committed to offer contemporary solutions with proper Zinc Aluminum composition materials to the construction industry of Sri Lanka. The Roof Master product range includes roofing, cladding, purlins, gutters and other required accessories. Steel products have gained fame for their superiority in the Sri Lankan market within a short period as it conforms to international standards. In this spectrum Zinc Aluminum compound becomes an effective protection layer on the steel base material to prevent penetration of corrosive factors

## ROOF MASTER RANGE ZINC ALUMINIUM COATING

The AZ value determines the thickness of the Zinc Aluminium coating and confirms the anti-corrosion strength of our products. Swisstek is committed to provide the best standard Zinc Aluminium coating found in the market in both Roof Master and Roof Master +. We follow through stringent quality testing processes to make sure these standards are maintained throughout.

Our word is our bond. We ensure all our products adhere to the highest quality standards and we deliver exactly what we promise.

GENERAL CROSS SECTION OF THE BASE MATERIAL OF ROOFING AND CLADDING PROFILES.

# ROOFING SHEETS

Swisstek Zinc Aluminium coated steel roofing. Quality has become a hallmark of Swisstek products due to strict adherence to the highest standards in sourcing material, use of state-of-the-art machinery, zero waste quality assurance process and the expertise of skilled workers. In addition to the standard sizes, Swisstek products are also geared to meet any specifications of the customers. Zinc Aluminium roofing sheets are ideal for commercial, industrial, residential buildings and many other construction requirements.

Thickness	0.42, 0.47
Effective width	760mm ± 6mm
Total width	790mm
Mass of coating	AZ 150
Grade of steel/hardness	G 450 - 550
RIB height	26mm ± 1mm
RIB width	50mm
RIB angle	61°

### SPECIAL FEATURE: ANTI-CAPILLARY GROOVE

# ROOFING TILES

An innovative Zinc Aluminium roofing solution to create aesthetics in your space. Contemporary designs to elevate the look of your building.

Thickness	0.35, 0.42, 0.47
Effective width	730mm ± 5mm
Total width	795mm
Mass of coating	AZ 150
Grade of steel/hardness	G 300 - 400
RIB height	25mm
RIB width	60mm
RIB angle	53°

### SPECIAL FEATURE: ANTI-CAPILLARY GROOVE

# CLADDINGS

Suitable for modern steel structures such as factory buildings, warehouses and gates as well as wall claddings widely used in commercial, industrial and residential buildings. Tailor-made fabrication for custom design. Available in an array of shades to satisfy customer requirements.

Thickness	0.42, 0.47
Effective width	771mm ± 6mm
Total width	798mm
Mass of coating	AZ 150
Grade of steel/hardness	G 450 – 550
RIB height	15mm
RIB width	32mm
RIB angle	68 ± 1°
